EXPERIENCE

Swirly Donut Inc. - Full Stack Software Engineer

June 2026 - Present

- Owned full-stack features from planning through release, contributing across the React/Next.js frontend, Electron desktop application, TypeScript APIs, database workflows, documentation, and code reviews.
- Combined development with QA responsibilities by performing functional, regression, integration, visual, and cross-platform testing, reproducing defects, validating fixes, and verifying web and Electron releases.
- Collaborated asynchronously within a 10-member distributed team across engineering, design, and product, coordinating implementation decisions, reviews, testing, and delivery.

Unibotech - Full Stack Web Developer

Aug 2025 - May 2026

JavaScript, TypeScript, Next.js, React.js, Node.js, Express.js, MongoDB, PostgreSQL, MySQL, Prisma

- Delivered end-to-end applications using TypeScript, React 18, and Node.js, designing RESTful APIs with Express and Prisma across SQL/NoSQL databases and implementing CI/CD pipelines for automated testing and deployment.
- Engineered a multi-currency e-commerce platform with Stripe integration, dynamic pricing, secure transaction processing, and complex customer workflows while optimizing APIs for concurrent usage.
- Optimized React and Next.js applications through SSR, lazy loading, code splitting, React hooks, rendering improvements, and SEO enhancements to improve production performance and discoverability.

Byte Scripterz - Mern Stack Developer

Oct 2024 - Aug 2025

JavaScript, Next.js, React.js, Node.js, Express.js, MongoDB, PostgreSQL, Prisma, Supabase

- Built multi-vendor e-commerce and marketplace platforms using React 18, Redux Toolkit, RTK Query, and performance-optimized PostgreSQL schemas.
- Designed secure RESTful APIs, middleware, and real-time workflows with Node.js, Express, Supabase, and PostgreSQL, powering live dashboards, notifications, and messaging.
- Developed responsive, reusable interfaces with Tailwind CSS, Ant Design, and MUI; improved production performance through optimized rendering, lazy loading, and code splitting while supporting CI/CD and automated testing.

PROJECTS

Knit - TypeScript, React.js, Next.js, Electron, Supabase, PostgreSQL, Drizzle ORM, Socket.IO, Tailwind CSS

- Built the React/Next.js frontend and Electron experience for an AI-native workspace connecting goals, documents, tasks, conversations, meetings, and people.
- Engineered tenant-aware backend workflows using TypeScript APIs, PostgreSQL, Drizzle ORM, real-time synchronization, and privacy controls; standardized security and request handling across 10+ API modules.
- Delivered end-to-end realtime notification workflows across backend, web, and desktop, including mentions, activity feeds, push registration, read states, and cross-window navigation; improved interaction performance and expanded unit, integration, contract, and Playwright coverage.

Wheat & Crop Disease Detection - Next.js, FastApi, Express.js, MongoDB, Python, Deep Learning (CNN)

- Bilingual AI platform for farmers to upload crop images and get real-time disease diagnosis with treatment recommendations.
- Built responsive UI with Next.js, developed REST APIs using FastApi, integrated MobileNetV2-based ML model in Python for image classification, and managed image/data storage with MongoDB.
- Optimized backend processing and API response time for fast, real-time predictions and smooth user experience.

Unibotech - Next.js, Node.js, Express.js, Stripe, PostgreSQL, Prisma, TailwindCSS

- Business website with multi-currency e-commerce store, admin panel, and Stripe-powered payments with webhook handling.
- Developed frontend using Next.js with SEO optimization (meta tags, structured pages), implemented backend APIs using Node.js & Express, integrated Stripe payment gateway & webhooks, and managed relational data using PostgreSQL with Prisma ORM.
- Configured CI/CD workflows in GitHub Actions to automate testing, build, and deployment processes, reducing manual intervention and accelerating release cycles

TECHNICAL SKILLS

- Technical Skills:** JavaScript, TypeScript, Python, React, Next.js, Electron, Redux Toolkit, Tailwind CSS, Node.js, Express.js, FastAPI, HTML5, CSS3, REST APIs, WebSockets, Socket.IO, Node-RED, Prisma ORM, Drizzle ORM, AI/LLM Integration, Machine Learning, Deep Learning
- Databases:** PostgreSQL, MongoDB, MySQL
- Developer Tools:** Git, Playwright, Supabase, Firebase, Vercel, Netlify, Render, VS Code, Visual Studio

EDUCATION

Khawaja Fareed University (KFUEIT)

2022 - 2026

Bachelor of Science, Computer Science (GPA: 3.81/4.00)

RYK, Pakistan

- Achievements:** Recipient of the Dean's Honour Roll Certificate in recognition of academic excellence., Gold Medal recipient for achieving the highest academic standing in the department.
